

## RX 350/500 (Side Step)

1. Determine the installation position in the order of A, B and C fig.1.mark the installation positions with masking tape,etc.paying attention to the overall balance and interference when opening and closing the door.
2. Thoroughly degrease the outside molding and spoiler mounting area,and apply the included product to the areas shown in fig.1-b.
3. Peel off  a small portion of the release paper from the double -side tape (fig.1), fold it outward, and temporarily attach the spoiler to the vehicle. Then use masking tape or something similar to hold the spoiler in place until the sealant is completely hardened.
