

Pillar Panel

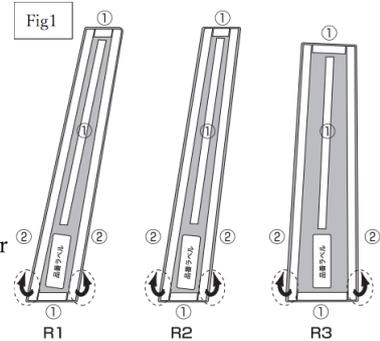

Set up Guide

List of included parts:	quantity
A: Double-sided tape	1
B: Sticker Set	1

1. Referring to figure 1, thoroughly degrease the back of the product (the side with the product name label) and attach accessory A about 1 mm from the edge of the product, referring to the diagram.
2. Refer to figure 2 and temporarily fit the product to the vehicle, check the application position, mark the vehicle with masking tape, etc., and thoroughly degrease the application surface of the vehicle.
3. First, peel off the release paper ① from the double-sided tape attached in step 1, then peel off a small amount of the release paper on the bottom of ② and fold it over to the front side.
4. Align the marking with the surface and slowly peel off the release paper ② that was folded over onto the surface, being careful not to tear it, and press the product onto the surface.
5. Apply attachment B to the desired location. (Degrease the area thoroughly, cut out the logo you need, peel off the backing paper base, apply it, rub it thoroughly over the application sheet, and slowly peel off the application sheet. finally, press the applied logo down gently to ensure it adheres well.)

Back of product Double-sided tape attachment location

Peel off the release paper a little and fold it over to the front side.

The first two digits on the product number label on the back of the product indicate where to attach it.

R is right side, L is left side,
1 is front, 2 is center, 3 is rear.
The side with the label is the bottom side.
◆ 4 piece vehicles are made up of 1 and 2.

This product is slightly smaller so that it does not get caught on the press lines or bends of the genuine pillar. R1 and R2 are positioned together to make it easier to determine the position neatly.

◇ Although the edges of this product have been chamfered, please be careful when handling it.

◇ If your vehicle is equipped with a visor, you will need to remove and reattach the visor to install this product. (Please prepare double-sided tape for visor installation separately.)
